**Canopy Cubby Installation**

Starting from either FRONT corner, tie one end of rope to appropriate frame rib. (fig. 1) Weave rope, alternating through grommets and around canopy frame until reaching the opposite corner from the starting point. (fig. 2) Tighten rope snugly while adjusting the Canopy Cubby evenly under the canopy frame. If cutting the rope is necessary, be sure to burn the cut ends to avoid unraveling.

---

**Care & Safety**

Do not climb, hang or crawl on the Canopy Cubby.
Do not store heavy or hard objects. (anchors, gas cans etc)
Always supervise children around the Canopy Cubby and water.
Do not store more than 90 lbs on the Canopy Cubby.
